MST-Kruskal's Algc

MST-KRUSKAL'S ALGORITHM

Implement Kruskal's Algorithm and display the edges after sorting by weight.

```
1 #include <stdio.h>
2
3 int main() {
4     int n, i, j, a, b, k = 0;
5     if (scanf("%d", &n) != 1) return 0;
6     int u[n * (n - 1) / 2], v[n * (n - 1) / 2], w[n * (n - 1) / 2];
7     int m = 0;
8     for (i = 0; i < n; i++) {
9         for (j = i + 1; j < n; j++) {
10             scanf("%d", &w[m]);
11             u[m] = i + 1;
12             v[m] = j + 1;
13             m++;
14         }
15     }
16     for (i = 0; i < m; i++) {
17         for (j = i + 1; j < m; j++) {
18             if (w[j] < w[i]) {
19                 k = w[i]; w[i] = w[j]; w[j] = k;
20                 k = u[i]; u[i] = u[j]; u[j] = k;
21                 k = v[i]; v[i] = v[j]; v[j] = k;
```
