2 marks

Q2 Identify the error in the following snippet.
2 marks

Q3 Find the bugs in the given snippet.
2 marks

Q4 Identify the error in the following snippet.
2 marks

Q5 Where is the error? Identify it.
2 marks

Q6 Identify the error and give me the correct answers.

Q36 What is the issue in the following C code.

2 marks

```
What is the issue in the following C code. struct node {  
    int data;  
    struct node *next;  
};  
void insert(struct node *head, int val){  
    struct node *temp = (struct node*)malloc(sizeof(struct node));  
    temp->data = val;  
    temp->next = head;  
    head = temp;  
}
```

A. Memory leak

B. Head not updated in main

C. Wrong allocation

D. Syntax error

QUESTIONS

Q1 Find the bugs in the following snippet.
2 marks

Q2 Identify the error in the following snippet.
2 marks

Q3 Find the bugs in the given snippet.
2 marks

Q4 Identify the error in the following snippet.
2 marks

Q5 Where is the error? Identify it.
2 marks

Q6 Identify the error and give me the correct answers.

Q37 Identify the error in the doubly linked list.

2 marks

Identify the error in the doubly linked list. `newNode->next = head;`
`head->prev = newNode;`
`head = newNode;`

A. Missing memory allocation

B. Missing NULL check for head

C. Wrong pointer assignment

D. No issue

Q4 Identify the error in the following snippet.
2 marks

Q5 Where is the error? Identify it.
2 marks

Q5 Where is the error? Identify it.

2 marks

Where is the error? Identify it. `int arr[] = {10, 5, 20, 15, 30}; int result = binarySearch(arr, 5, 15);`

A. Function call incorrect

B. Array size mismatch

C. Array not sorted

D. Key not present

Q4 Identify the error in the following snippet. 2 marks

Q5 Where is the error? Identify it. 2 marks

Q5 Identify the error and give me the correct answers.

2 marks

Identify the error and give me the correct answers. #define MAX 5 int stack[MAX]; int top = -1; void push(int x) {if(top == MAX) {printf("Overflow"); return;} stack[++top] = x;}

A. Stack size is wrong

B. Overflow condition is incorrect

C. top initialization wrong

D. push syntax incorrect

Q5 Where is the error? Identify it. 2 marks

Q7 Find the error in the stack deletion operation. Justify it.

2 marks

Find the error in the stack deletion operation. Justify it. `int pop() {if(top == 0) {printf("Underflow");return -1;}return stack[top--];}`

A. pop should not return value

B. Underflow condition is incorrect

C. Missing increment

D. Wrong stack array

Q2 Identify the error in the following snippet. 2 marks

Q3 Find the bugs in the given snippet. 2 marks

Q4 Identify the error in the following snippet. 2 marks

Q5 Where is the error? Identify it. 2 marks

Q6 Identify the error and give me the correct answers.

Q10 What is the issue in the following snippet? 2 marks

```
What is the issue in the following snippet? #define MAX 5
int queue[MAX];
int front = 0, rear = 0;
void enqueue(int x) {
    if(rear == MAX) {
        printf("Overflow");
        return;
    }
    queue[rear++] = x;
}
```

A. Queue size incorrect

B. Overflow condition incorrect

C. front initialization wrong

D. enqueue syntax wrong
